THE NRP GROUP: SUSTAINABILITY

The NRP Group has begun efforts to improve the environmental footprint of assets across our portfolio.

We have embarked on portfolio-wide initiatives that have generated over half a million dollars in utility savings across our communities. These improvements range from LED lighting conversions to ultra-high efficiency toilet implementations, to irrigation controllers and monitoring.

To add to these efforts, 1,760 of our apartment units have earned LEED certification and over 2,000 additional

units have earned an Enterprise Green Community Designation.

We are also pursuing Passive House builds in our construction process and have begun to deliver units that earn this distinction.

The NRP Group will continue to expand our sustainability efforts as an ongoing initiative.
